

AN EXTENSIVE BIBLIOGRAPHY ON THE JAGUAR¹
A working draft, 23 April, 1999

By: E. Lee Fitzhugh², Gilberto Ríos Ú³, Paule M. Gros¹, William E. Van Pelt⁴, and Raul Valdéz⁵.

(Appendix added by Robert J. Wiese⁶ through time.)

Introduction

This bibliography is extensive, but not definitive. In addition to scientific literature, we include unpublished reports, popular articles, and even some field guides where they seem to contribute new information or represent old information no longer well recognized. Our primary interest is in jaguar (*Panthera onca*) biology, life history, and management. We include literature from such other disciplines as veterinary medicine, behavioral science, zoo management, archaeology, and anthropology, although in the areas more peripheral to biology we may have missed much. We tried to screen out fiction, although in one case, we purposely included a fictionalized biography that includes extensive treatment of jaguar hunting. We gathered the information by directed searches (by hand and by computer) of library catalogs and databases, by examining the citations of selected publications, by browsing among library shelves, by incorporating another existing bibliography from the Arizona Game and Fish Department (by Raul Valdez and William E. Van Pelt), and by somewhat random excursions into the literature of related disciplines.

Even at this stage of preparation, we find new citations almost weekly -- sometimes whole lists of them. Even so, our efforts now provide diminishing returns, and we believe it is time to circulate this draft to a select audience of jaguar (or yaguar) experts in hopes that you will send us some of the citations that so far have eluded us. We also are still correcting errors in the citations. We do not ask you to proofread for us, but if you happen to notice an error, we would appreciate the favor if you would bring it to our attention. We have not been able to examine all the works represented by citations in the bibliography. Some are not available to us, and the sheer numbers are simply too great to allow for total examination. If you are familiar with cited works that you believe should or should not be included, please tell us your opinions and reasons.

⁴ Arizona Game & Fish Department, 2222 W. Greenway Rd., Phoenix, AZ 85023.

⁵ WLSC, Box 4091, New Mexico State University, Las Cruces NM 88003-8001.

⁶ Fort Worth Zoo, 1989 Colonial Parkway, Fort Worth TX 76110

We are now preparing this bibliography for publication. There will be some additional editing and addition of newly discovered citations. Some of the citations are incomplete, and we have been unable to discover the necessary information. Some perhaps should not be included, but we have not had them in hand to examine. If you discover citations that should be included, additional information for incomplete citations, or have other suggestions, please send them to us at one of the addresses below. We both speak Spanish and English, and can read Portuguese, so language is not a barrier.

Acknowledgments

We would like to acknowledge the financial support of Safari Club International through the services of Bill Wall, and of the American Zoo and Aquarium Association through the services of Robert J. Wiese, and the University of California Cooperative Extension in completing this work. The following people helped us gather citations and work with the database: Rebecca Lewison, Maria Renata Pereira Leite, Arizona Game and Fish Department, Mike Pruss, Lily K.Chan, Karen Yee, Christine Yee, Keysa Williams.
